- Learning new skills and technologies
- Creative Video Editor
- Fitness & Wellness
- Traveling

PROFILE

Highly motivated Full Stack Java Developer with strong knowledge of Java, HTML, CSS, JavaScript, SQL, and PostgreSQL. Skilled in building responsive web applications using Spring Boot, Hibernate, React.js, and Bootstrap. Proficient in using development tools like Git, GitHub, IntelliJ IDEA, Maven, and VS Code. Passionate about learning new technologies and delivering clean, efficient, and scalable solutions.

PROJECTS

Bus Ticket Booking System:

The project successfully demonstrates a Bus Ticket Booking System using front-end technologies (HTML, CSS, JavaScript). It provides a responsive, interactive, and easy-to-use interface for booking tickets and confirming details. This project highlights practical web development skills and can be extended further with backend integration for real-time bookings and payments.

- Github Repository: <https://github.com/aniketpaygavhan/Bus-Ticket-Booking-System>

Virtual Assistant:

The project successfully implements a basic Virtual Assistant interface using only HTML and CSS. It provides a clean, responsive, and interactive chat-like experience for users. While this project simulates a simple assistant, it can be further extended with JavaScript or AI APIs to enable real-time intelligent responses.
